AMERICAN PRODUCERS SUPPLY
Industrial, Construction and Oil Field Supplies

3M Premier Service
Industrial Products Distributor

About our Company...

American Producers Supply provides materials, tools and safety products for a wide range of industries, including manufacturing; rail and river transportaton; road, bridge and dam construction; general construction; power generation; oil and gas producers; pipeline construction; and the chemical and metallurgical industries. This booklet highlights only a fraction of the products we offer. Our experienced sales people are committed to finding the items you need; sourcing hard-to-find products is our specialty!

American Producers operates out of eight locations, providing delivery service to our customers. Merchandise is transferred daily from the central distribution center in Marietta to all branches, providing quick and easy access to inventory and services throughout the company, including tool repair and custom-manufactured slings.

Professional Tool Repair Service

American Producers is an authorized repair center for CM Hoist, DeWalt and Milwaukee tools and an Authorized Enerpac Service Center. We also have authorized repair facilities for Honda Power Equipment, Husqvarna Construction Products, and Stihl.

Sling Manufacturing, Repair and Certification

American Producers custom builds chain and wire rope slings, and provides inspection, repair and certification of chain, web, and wire slings. These services are offered through the Huntington location.

Radio Frequency ID (RFID) Services

The Huntington location also provides Radio Frequency ID (RFID) Services for harnesses, lanyards, safety gear, critical slings, and many other applications.

Safety Training

Safety seminars are available for a variety of products and applications. America Producers provides this training in conjunction with our product suppliers.

Synthetic Endless Roundslings

Roundslings are constructed from a continous loop of 100% polyester fiber that is covered with a double polyester woven jacket to protect the load-bearing fibers from damage. Because the load-bearing fibers never come in contact with the load, they are protected from cuts, abrasions and ultraviolet degradation.

Each sling has a tough, resilient tag for quick and easy identification. Also printed on the tag is "American Producers Supply" and our telephone number to make re-ordering quick and easy.

Advantages of roundslings:
- Lightweight—easy to handle and store
- Cover abrasion will not reduce capacity
- Provides a strong grip on loads
- Provides a tighter choke with an easier release
- May be used in a vertical, choker or basket type hitch
- Capacities are color coded

Length is measured from bearing point to bearing point.

PHILLYSTRAN

Dyneema® Fiber Rope

X-TREMA LINE is a 12-strand braided rope made from genuine Dyneema® SK75 fiber. X-TREMA LINE is unprecedented in its strength-weight ratio, providing break strengths comparable to steel wire rope, at only about 1/7 of the weight and at similar diameters.

The unique properties of the Dyneema® yarn provide X-TREMA LINE with excellent resistance to abrasion, UV, salt water and most chemicals. Further to that, X-TREMA LINE has a specific gravity of only 0.975, making it float on water and extremely light, providing unparalleled ergonomics to those handling the rope and allowing for faster operations.

¾" 12-Strand Braided Rope

- Weight: 11.7 lbs. per 100 ft.
- Minimum rated break strength (spliced): 63,300 lbs.
- High-visibility green coating

- Abrasion and puncture resistance for tough use in a factory or on a field
- Water and oil resistance for secure attachment
- Performs across a broad temperature range from -40 to 160° indoors and out

Many uses—

- Tool handles
- Steering wheels for construction equipment, tractors and forklifts
- Lawnmower handlebars
- Sports equipment
- Handrails

Available three ways:

Adhesive-backed. Sticks on contact to most materials as quickly and easily as tape.
Plain-backed. Can be sewn to fabric and leather.
Ready-to-use molded grips. Custom designed and manufactured to slip over handles and shafts.

Ask your salesperson for help in selecting the right gripping material for your application.

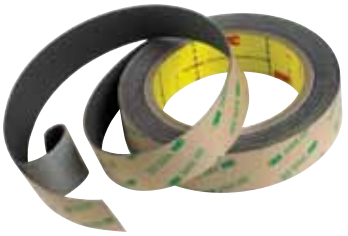

Select the material with the balance of tactility (soft/firm), durability (low/high), and friction that best suits your application.

Purchase trial bag(s) for application testing.

You can purchase any adhesive-backed materials as rolls or sheets for testing your application.

- Two 1" x 15' rolls per bag OR
- Six 6" x 7" sheets per bag

** 3M recommended for relief against nuisance levels of organic vapors and acid gases. Nuisance level organic vapor and acid gas refers to concentrations not exceeding OSHA PEL, or applicable government occupational exposure limits, whichever is lower. Do not use for respiratory protection against acid gases or organic vapors.

† Reminder: These cartridges are approved for respiratory protection from hydrogen sulfide gas up to 10 times the permissible exposure limit (PEL) with half facepiece respirators and full facepiece respirators when qualitatively fit tested, or up to less than 300 parts per million (ppm) with full facepiece respirators when quantitatively fit tested or according to specific OSHA standards or applicable government regulations, whichever is lower. 300 ppm is the concentration considered immediately Dangerous to Life or Health (DLH) for hydrogen sulfide.

THE SPRAYON SYSTEM

Sprayon's packaging helps your workforce understand how to use each product with three (3) simple characteristics:

1. Product names that clearly communicate to the user what the product is and its intended application.
2. Specific product categories identified through color-coding and the use of descriptive category prefixes.
3. The use of iconography and pictographs to communicate key product attributes in a clear, concise and effective manner. The icons communicate such attributes as temperature range, load bearing capacity (for lubricants), flammability, dielectric strength, metals content, and many more.

HeatTrak® Snow Melting Mats

The HeatTrak Industrial Products are heavy-duty safety mats designed to prevent snow and ice accumulation on walkways and stairs by melting snow on contact.

The Industrial Walkway Mat is made of an electrically operated heating element sandwiched between two protective surfaces of flame retardant reinforced SBR rubber, enabling it to endure harsh wear.

It plugs into any standard 120V or 240V outlet generating heat to melt snow at a rate of 2 inches per hour.

The mat can be secured to the ground using its built-in grommet holes and is designed to be left outside for the entire winter season.

Each Industrial Snow-Melting Walkway Mat comes with its own ELCI plug (equipment leakage circuit interrupter).

Industrial Snow-Melting Walkway Mats are available in many sizes from 24 in. x 5 ft. up to 48 in. x 6 ft. Snow-Melting Stair Mats come in sizes from 11 in. x 36 in. up to 11 in. x 96 in. *Available by special order.*
